¿Quiénes y cuantos conocen la Agenda 2030 y los ODS?

¿Qué son y para que sirven las agendas globales? (*algunas reflexiones sobre la idea de governance*)

¿Cuáles son los retos y las oportunidades en el marco de los ODS?

How well do people know the SDGs?

Using different methods and covering different sets of countries, surveys find that **between 35 and 45 per cent of people have heard of the goals**. AIESEC's Youth Speak report (2016) suggests that young people have a higher level of SDG awareness than average, a finding that is generally replicated in demographic analyses of other surveys.

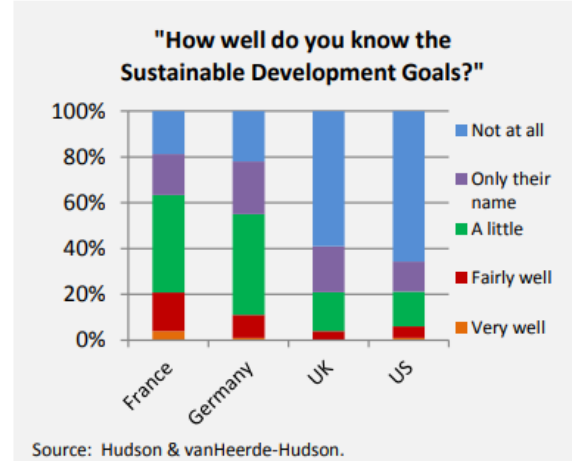

SDG *awareness* does not necessarily translate into *knowledge*. Glocalities (2016) finds that, **across 24 countries, only around 1 in 100 citizens know the SDGs 'very well'**, while 25% say they know the name only.

According to the latest Eurobarometer (2017), just

| Source | Awareness of SDGs | Knowledge of SDGs |
|----------------------------------|-------------------|-------------------|
| Eurobarometer (2016) | 36% | 10% |
| Eurobarometer (2017) | 41% | 12% |
| Globescan Radar (2017) | 35% | n/a |
| AIESEC Youth Speak Global Report | 45% | n/a |

over **1 in 10 Europeans know what the SDGs are**.

There are major disparities between countries. Hudson & vanHeerde-Hudson (2016) find that in Germany and France, 2 in 10 citizens say they are not aware of the SDGs, compared with about 4 in 10 citizens in the United Kingdom and United States.

It is important to note that the findings of these surveys need to be treated with caution. "Social desirability bias", in particular, will lead many people to overreport their awareness or knowledge of the SDGs.

Nonetheless, **awareness that there is a global set of goals appears to be on the rise**. Both Eurobarometer and Globescan find that awareness of the SDGs is generally greater today than awareness of the Millennium Development Goals was in earlier surveys.

Global Survey Shows 74% Are Aware of the Sustainable Development Goals

- 74% of adults globally are aware of the United Nations Sustainable Development Goals (SDGs)
- Great Britain and Japan rank lowest in terms of familiarity, with 51% having never heard of them; 50% of respondents in the United States have never heard of the SDGs; in comparison, 92% of respondents in Turkey have heard of them
- The top-ranked SDGs are those related to humanitarian human needs, including zero hunger, clean water and good health
- Learn more [here](#) and follow the Sustainable Development Impact Summit 2019 at <http://wef.ch/sdi19>

New York, USA, 23 September 2019 – Three out of four adults (74%) globally have some awareness of the United Nations Sustainable Development Goals (SDGs), according to a new survey commissioned by the World Economic Forum.

The survey, conducted for the Forum by Ipsos Group, asked almost 20,000 people aged between 16 and 74 from 28 countries how familiar they were with the SDGs and which SDGs they thought were the most important. The 17 SDGs represent the UN's [2030 Agenda for](#)

Q1. How familiar are you with the Sustainable Development Goals set by the United Nations?

Three out four adults (74%) across the 28 countries surveyed claim having some awareness of the UN's Sustainable Development Goals. Awareness is highest in Turkey (92%), mainland China (90%), followed by India (89%) along with Brazil, Malaysia and Sweden (87% in all three). However, it is the case of about half of all adults in Japan (49%), Great Britain (49%), the United States (50%) and Canada (51%).

While those who say they are somewhat or very familiar with the UN SDGs make up one quarter of all adults globally (26%), they are a majority in India (55%), Turkey (53%), China (52%) and Saudi Arabia (51%). In contrast, only about in ten of people surveyed in Japan (8%), France (11%), Italy (11%), Canada (11%), and Great Britain (13%) report being familiar with the SDGs.

agendas globales y acciones locales

Al tratarse de iniciativas de naturaleza intergubernamental sin obligaciones legales para los firmantes, la pregunta es:

¿sirven de algo?

.....a veces, la impresión es que estas agendas proponen unos objetivos deseables pero generales, alejados de los retos a los que nos enfrentamos (*desempleo, educación, las transformaciones de los barrios y las comunidades de las ciudades*) y extremadamente ambiciosos y difíciles de alcanzar

| Datos destacables | Metas del objetivo 5 | Enlaces |

The **Millennium Development Goals** (MDGs), adopted in 2000 by the United Nations, were the first of their kind: a global strategy with quantifiable targets to help eradicate poverty.

They represent a historic and effective method of global mobilisation brought about to achieve a set of important social priorities worldwide.

They were directed however towards the **poorest regions** of the world and the need to focus on developing countries first.

MDGs vs. SDGs

In contrast, since 2015, the SDGs have been considered to be **transformational**, reflecting the growing urgency of sustainable development for the entire world.

They represent a new universal Agenda, **removing the “developing” versus “developed” dichotomy and the notions of “donors” and “recipients”**.

Now, everyone has been called upon to act and play their part in helping to secure a more prosperous and sustainable future.

Global governance through goals

- Unlike past global governance efforts that largely relied on top-down and market-based approaches, the 2030 Agenda relies on “governance through goals” (*Biermann et al, 2017; Kanie and Biermann, 2017, Biermann 2018*).
- This novel form of global governance is defined by **weak** institutional **intergovernmental** arrangements and the **lack of legal binding commitment** of countries to global goals set internationally.
- It follows a **comprehensive, inclusive, bottom-up, non-confrontational, country-driven** and **stakeholder-oriented** approach. Indeed, the SDGs set by the UN are eminently **aspirational**.
- Even when quantitative and clearly defined targets have been defined, governments can still rely on the non-binding nature of the goals to decide about their implementation. Indeed, national governments **retain the authority to interpret and implement the 2030 Agenda**.

¿Quiénes y cuantos conocen la Agenda 2030 y los ODS?

¿Qué son y para que sirven las agendas globales? (*algunas reflexiones sobre la idea de governance*)

¿Cuáles son los retos y las oportunidades en el marco de los ODS?

Governance and the SDGs

- Although innovative and pragmatic, the governance through goals paradigm implies some crucial risks such as: **low implementation** records and **policy failure** (*particularly, if governments and stakeholders lack clear incentives*).
- When legal sanctions are not feasible, **coercion** cannot be used to modify and/or direct actors' behaviour. Other policy elements, such as **effectiveness** and **legitimacy**, acquire more relevance in guaranteeing actors' compliance and —consequently— policy **support**

2030 AGENDA

ASPIRATIONAL AND NOT BINDING

NEED OF LONG-TERM POLICY SUPPORT

POLICY SUPPORT = f [Policy legitimacy ; policy effectiveness]

INPUT
LEGITIMACY

Negotiated preferences

OUTPUT
LEGITIMACY

Accountability

Policy design

SDGs LOCALIZING is crucial as

+++ legitimacy

+++ effectiveness

+++ policy support

The virtuous circle of SDGs

Persistent support to the long-term implementation of the 2030 Agenda can be better achieved when SDG policies are determined:

- according to the preferences of stakeholders;
- when political authorities are kept **accountable** to citizens;
- when policies are **sensitive to the demands**, needs and contextual social, economic and political characteristics of the territory.

Moreover, political authorities with the power and the responsibility to take action must be accountable to citizens, and policies must be effective in the sense of being sensitive to the demands, needs and contextual social, economic and political characteristics of the territory.

Whole-of-government y Whole-of-society approaches:

enfoques sobre la gobernanza en los que la formulación de políticas se caracteriza por la coherencia de las políticas entre niveles de gobierno y sectores, la participación de los stakeholders en las diferentes etapas del ciclo de las políticas (definición de las prioridades, deliberación, implementación y evaluación) y un fuerte compromiso con el monitoreo y la evaluación de los resultados, así como con la transparencia y la rendición de cuentas.

Enfoque territorial sobre desarrollo local (Territorial Approach to Local Development, TALD):

estrategia de desarrollo que reconoce la naturaleza endógena de las políticas para el desarrollo. Esto implica que los gobiernos locales y regionales deberían ser agentes autónomos y suficientemente dotados para contribuir plenamente a la definición, producción y provisión de bienes y servicios públicos adaptados a la realidad local. Desde aquí, es posible argumentar que una aproximación TALD debería siempre considerarse para la definición de estrategias nacionales de desarrollo, ya que aumenta la efectividad y la legitimidad de dichas estrategias.

Solo para citar un ejemplo: es probable que la **descarbonización** y la **transición energética** solo puedan ocurrir mediante la colaboración de múltiples niveles de gobierno (y administraciones públicas correspondientes), la inclusión de todos los agentes interesados (empresas, universidades y sociedad civil) y sobre todo mediante un cambio de paradigma en nuestros estilos de consumo y de producción.

Si pensamos a los territorios como **sistemas** en los cuales los actores intercambian recursos a partir de diferentes posiciones, la pregunta de interés es: **¿Cuál es la contribución de los LRGs en alcanzar los objetivos de una transición energética que mejore tanto la sostenibilidad del territorio como las condiciones de vida de sus habitantes?**

Bajo este marco se abren varias líneas argumentativas que se centran en las interdependencias de intervenciones en sectores, en muchos casos, bajo la responsabilidad de los LRGs cuales, por ejemplo:

- El ordenamiento del territorio a escala urbana (urban planning)
- La gobernanza metropolitana
- La regulación del espacio público
- La vivienda
- Las desigualdades territoriales entre distritos de una misma ciudad y entre centro y periferia
- La segregación educativa
- El acceso a la cultura
- Los modelos de producción y consumo del sistema territorial con particular atención a los alimentos y a la comida
- Etc..

of the Regions**

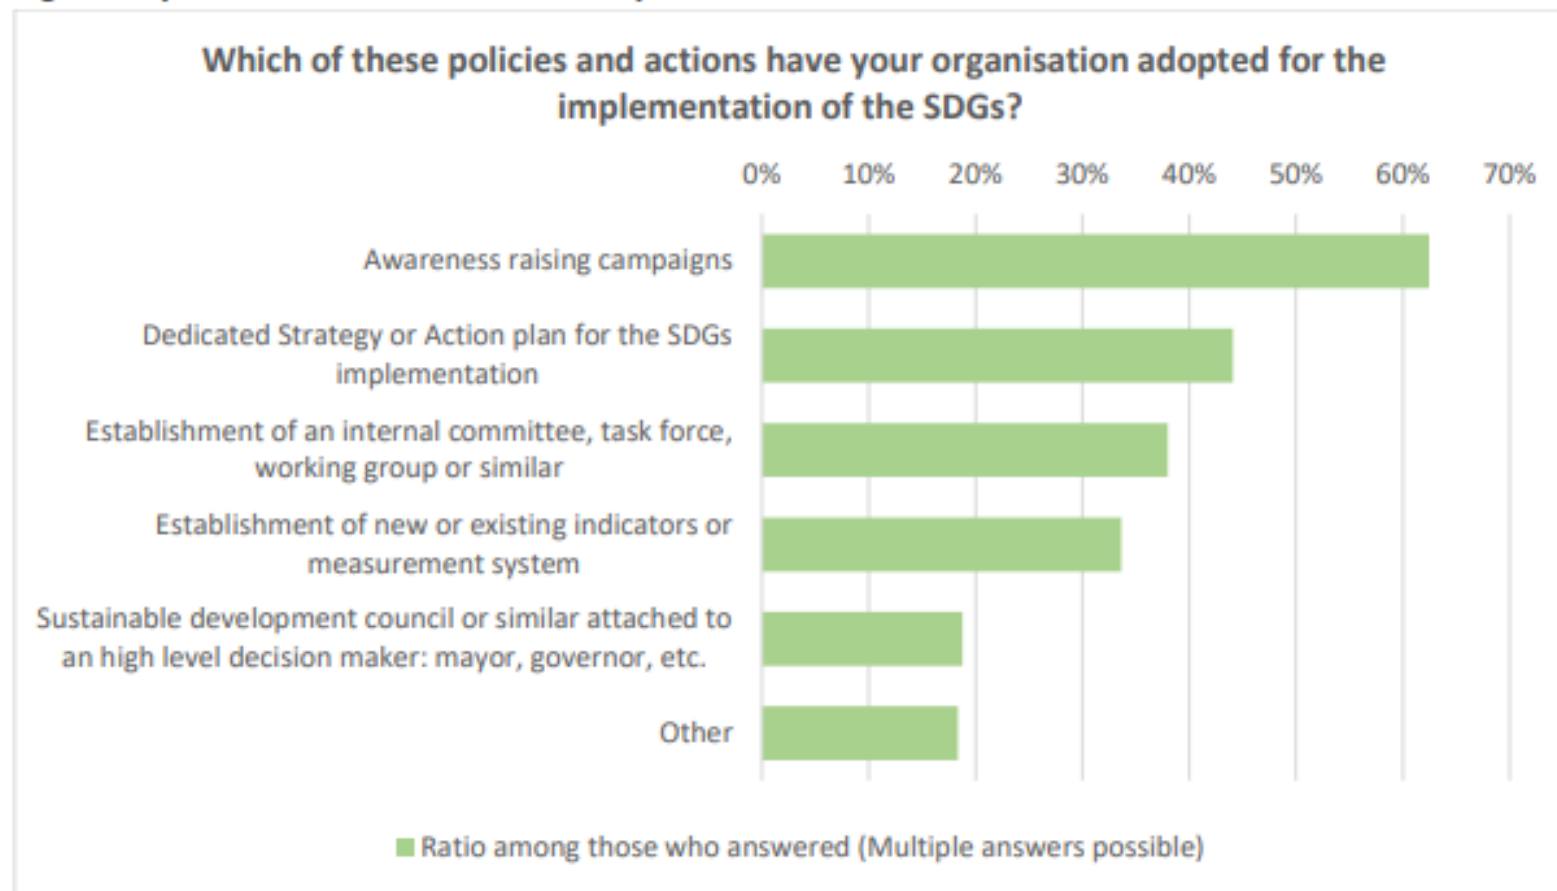

Survey Results Note

The key contribution of regions and cities to sustainable development

From 13 December 2018 to 1 March 2019, the European Committee of the Regions (CoR) in cooperation with the Organisation for Economic Cooperation and Development (OECD) carried out an online survey on "***The key contribution of regions and cities to sustainable development***".¹

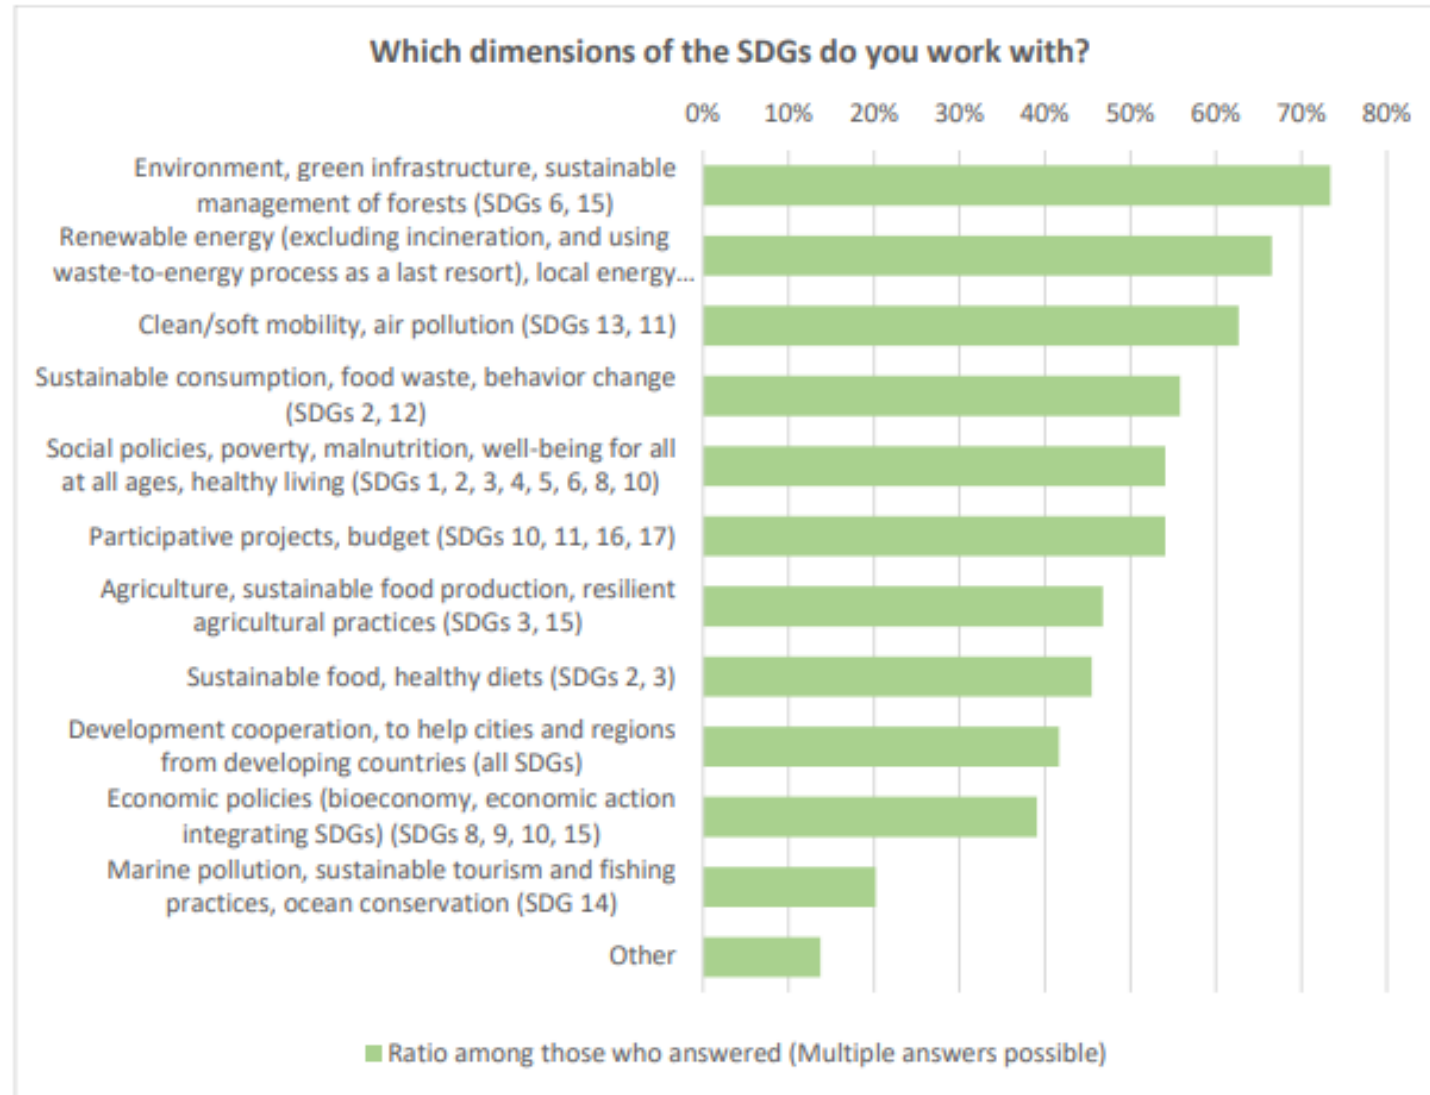

The survey was aimed towards representatives of local and regional authorities as well as other stakeholders at local and regional level, and concerned their work on sustainable development (SD) and in particular their contribution to the Sustainable Development Goals (SDGs). The key results of the survey are summarised in this note,² while the full figures are available in the annex.

The present PLATFORMA-CEMR study is based on 26 responses from national associations of local and regional governments 8 encompassing 24 countries 9 from all across Europe, eight of which are non-EU members. The 24 countries represent 51,840,000 people and the associations represent 90% of this population.

SDGs are still perceived as overly disconnected from realities on the ground and many stakeholders remain unsure of their value.

How do you deal with the SDG's interlinkages and transversality ?

- No strategy
- Joint activities with externs
- Inter-departemental working methods
- Other
- Focus on one-few SDG's
- No answer

How has the SDG framework helped your organisation to develop your partnerships?

- Working with European and international networks
- No influence
- Working with external stakeholders
- Collaborating with the national government
- Other
- Developing international partnership

Main promoters of SDG Initiatives
